

The background of the slide features three stylized human figures. One figure is a solid teal color and is the largest, positioned on the right side. Behind it and to the left are two other figures in a lighter, semi-transparent teal color. The figures are simple, with circular heads and rounded, blocky bodies and limbs.

# CANADIAN COMMUNITY HEALTH SURVEY Data and Products

Sylvie Lafortune  
Laurentian University  
DLI Spring Meeting (ON)  
April 13, 2010

# Overview

- Background on CCHS
- CCHS content
- CCHS geography
- Products
  - Health Indicators
  - Health Profile

# Background on CCHS

- Launched in 2000 as part of the *Health Information Roadmap Initiative*
- Includes partners at federal, provincial and health regions levels => content & collection changes are constant!
- Supersedes the NPHS cross-sectional component

For background and progress reports, see the [Health Information Roadmap Initiative](#) webpage on the Canadian Institute for Health Information website

# Background on CCHS

- Targets persons aged 12 years and older living in private dwellings in the 10 provinces and 3 territories
- Data is self or proxy-reported
- CCHS has evolved considerably in past decade
- Major redesign in 2007

# Purpose of CCHS

## Objectives until 2005

- Provide timely and reliable estimates of
  - health status
  - health care utilization
  - health determinants
- Gather data at the sub-provincial levels of geography

## Revised objectives after 2005

- Support health surveillance programs at nat/prov/reg levels
- Timely release of data easily accessible to diverse community of users
- Include rapid response option to address emerging issues
- Support health research on small populations and rare characteristics

# Core content topics

- Alcohol
- Chronic conditions
- Exposure to second-hand smoke
- Fruit and vegetable consumption
- General health
- Health care utilization
- Height and weight
- Injuries
- Mammography
- Maternal experiences
- PAP smear test
- Physical activities
- Restriction of activities
- Smoking
- Two-week disability
- Income
- Socio-demographic characteristics
- Administration
- Labour Force (short form)

# CCHS content structure

2001-2005

- Based on 2-year collection cycle
- Year 1 Main file -> **.1** – general health survey provides data at the regional level – large sample: 130, 000 cases
- Year 2 Thematic file -> **.2** – special topic survey provides data at the provincial level – smaller sample size: ~35, 000 cases

# CCHS content structure

2007 redesign:

## 1. Changes in collection:

- “continuous collection process”
- new sample of 11, 000 every two months

## 2. Changes in content:

- common content is split in core and theme;
- optional content;
- new “rapid response” content

# CCHS content structure

2007 redesign:

## 3. Changes in dissemination:

- annual data files
- two-year data files
- rapid response files, and more

## 4. Changes in designations:

- CCHS cycle 4.1 →
  - CCHS – Annual component, 2008

## Releases

# Canadian Community Health Survey: Rapid response on sleep apnea and osteoporosis

2009

Sleep apnea rapid response data from the Canadian Community Health Survey (CCHS) January/February 2009 collection period are now available.

Osteoporosis rapid response data are also now available from the CCHS March/April 2009 collection period.

**Definitions, data sources and methods: survey number [3226](#).**

# CCHS geography

- National
- Provincial
- Infraprovincial
  - Health regions (defined by provinces)
  - Combined health regions (G)

# CCHS geography

- Peer Groups = groups of health regions with similar socio-economic characteristics
- StatCan identified 24 variables and used cluster and discriminant analyses

# CCHS geography

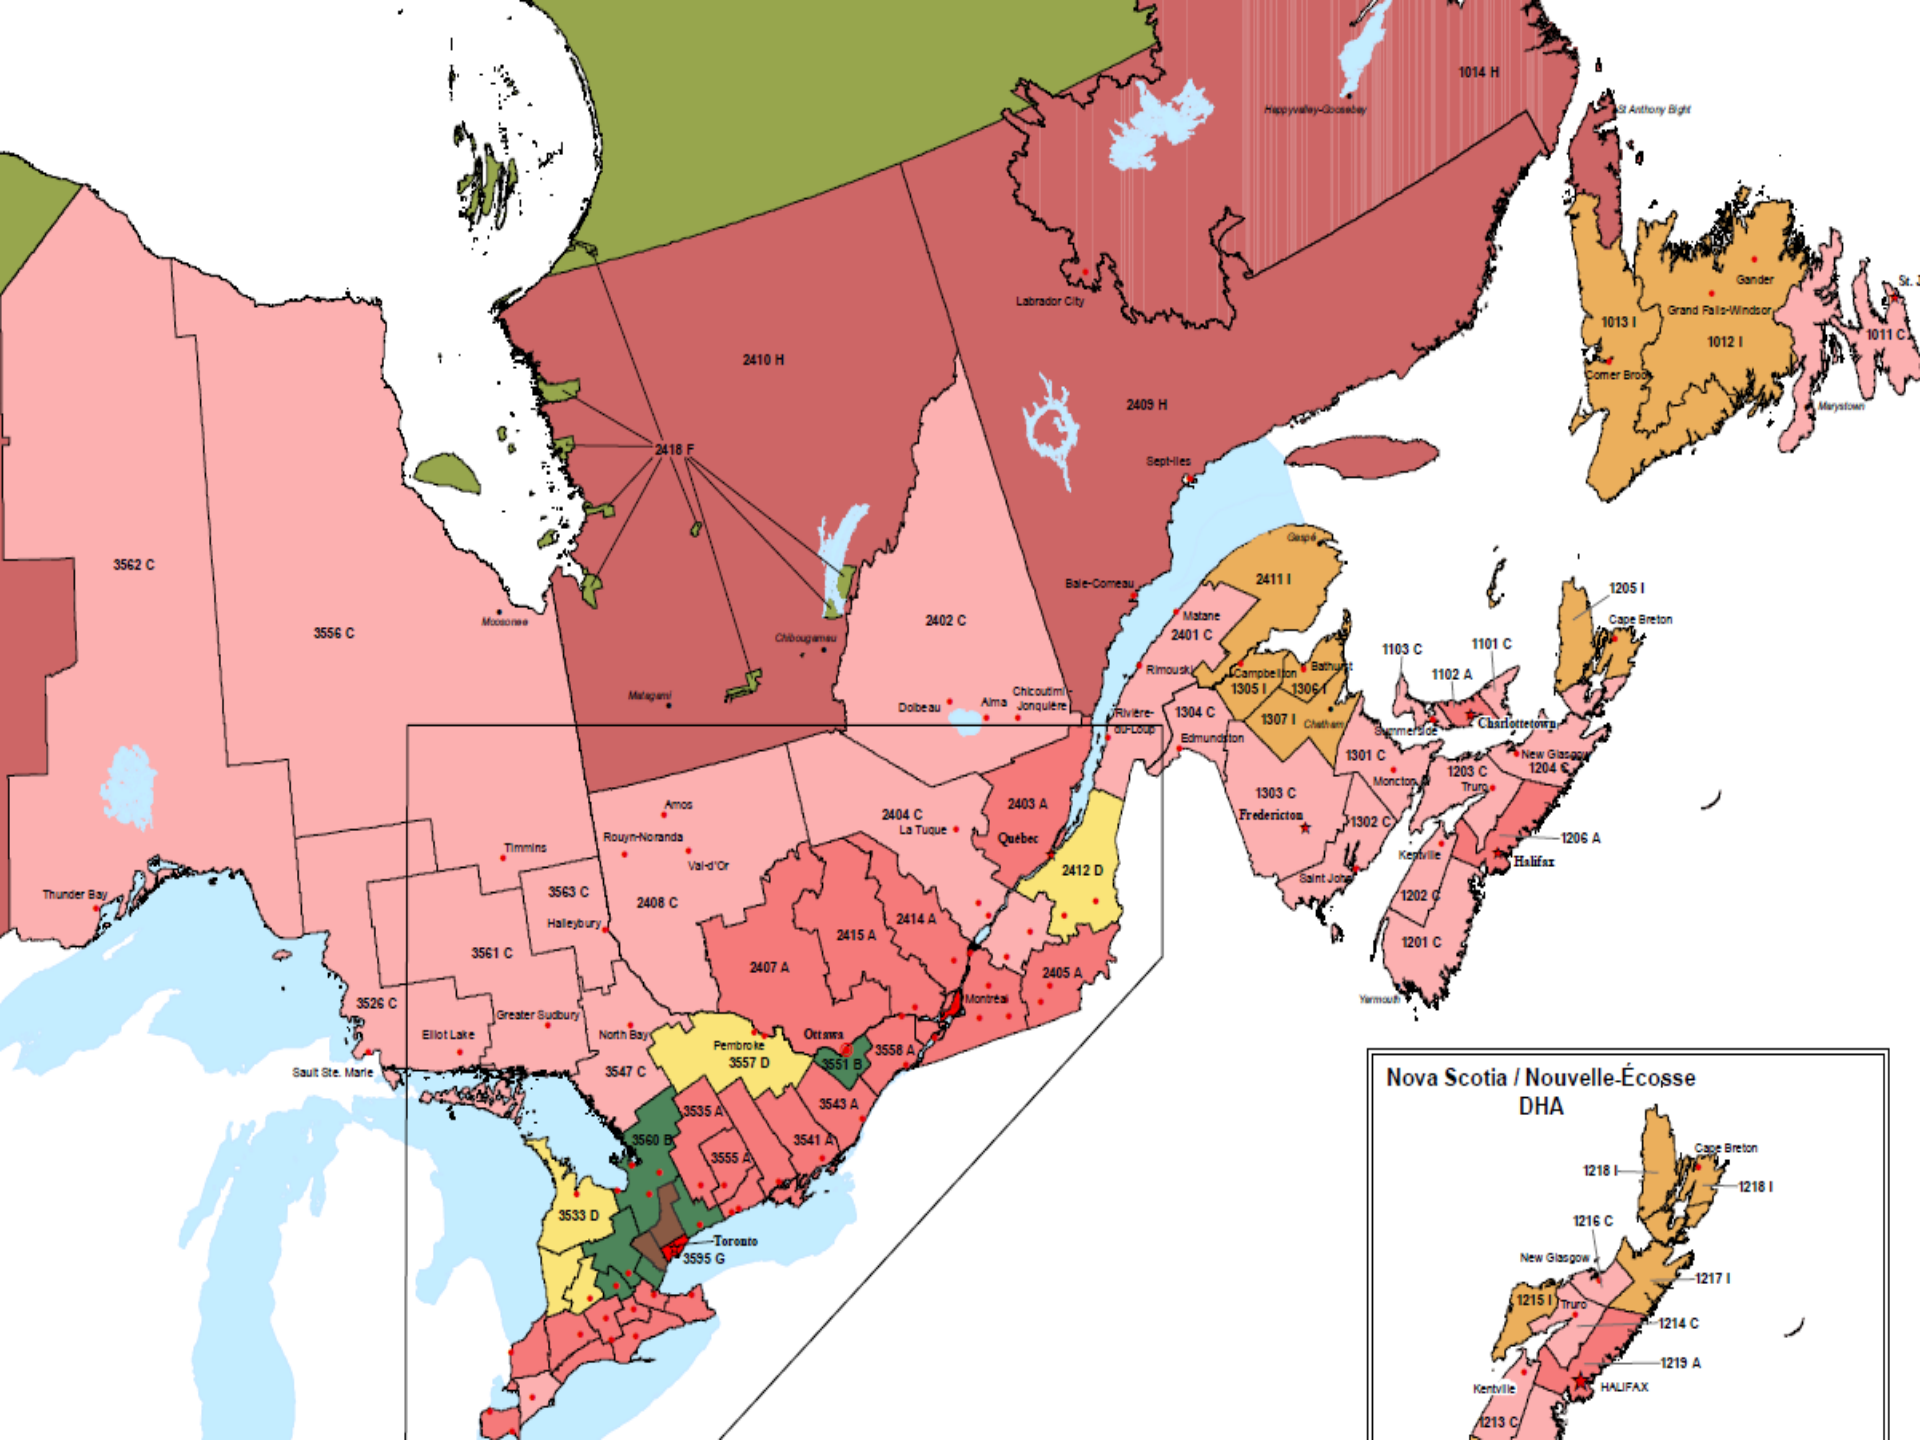

- 4 strongest predictors of final peer groups<sup>(1)</sup>:
  - Population density
  - Aboriginal population
  - Employment rate
  - Immigration population

(1) A detailed discussion on the rationale and methods involved in the development of peer groups is available in ["Health Region \(2007\) Peer Groups Working Paper"](#).

# Peer groups and principal characteristics

Peer group	Number of health regions	Percent of Canadian population	Principal characteristics
A	35	33.5%	<ul style="list-style-type: none"> <li>• Urban-rural mix from coast to coast</li> <li>• Average percentage of Aboriginal population</li> <li>• Average percentage of immigrant population</li> </ul>
B	8	16.7%	<ul style="list-style-type: none"> <li>• Mainly urban centres in Ontario and Alberta with moderately high population density</li> <li>• Low percentage of Aboriginal population</li> <li>• Very High employment rate</li> <li>• Higher than average percentage of immigrant population</li> </ul>
C	22	10.3%	<ul style="list-style-type: none"> <li>• Sparsely populated urban-rural mix in Eastern and Central provinces</li> <li>• Average percentage of Aboriginal population</li> <li>• Average employment rate</li> <li>• Low percentage of immigrant population</li> </ul>
D	18	5.1%	<ul style="list-style-type: none"> <li>• Mainly rural regions from Quebec to British Columbia</li> <li>• Average percentage of Aboriginal population</li> <li>• High employment rate</li> </ul>
E	9	3.1%	<ul style="list-style-type: none"> <li>• Mainly rural and remote regions in the Western provinces and the Territories</li> <li>• High proportion of Aboriginal population</li> <li>• Average percentage of immigrant population</li> </ul>
F	5	0.4%	<ul style="list-style-type: none"> <li>• Northern and remote regions</li> <li>• Very high proportion of Aboriginal population</li> <li>• Very low employment rate</li> <li>• Low proportion of immigrants</li> </ul>

Was there ever a time in your life when you had a strong fear or a great deal of concern about being too fat or overweight?

# What CCHS PUMFs are available ?

- 2001: Cycle 1.1 General File
- 2002: Cycle 1.2 Mental Health and Well-being
- 2003: Cycle 2.1 General File
- 2004: Cycle 2.2 Nutrition General Health Component

- 2005: Cycle 3.1 Main File
  - 2005: Cycle 3.1 Sub-sample 1: Health Utility Index (HUI), Fruit and Vegetable Consumption and Labour Force (long form)
  - 2005: Cycle 3.1 Sub-sample 2: Measured Height and Weight
  - 2005: Cycle 3.1 Sub-sample 3: Access to Health Care Services, Waiting Times and Patient Satisfaction
- 

- 
- 2007-2008:
    - CCHS Annual component (Cycle 4.1)
  - Currently all available on <odesi>
  - Currently in EQUINOX
  - Only 2-year data PUMFs are planned
  - The next CCHS PUMF will be for 2009/2010 → Fall of 2011

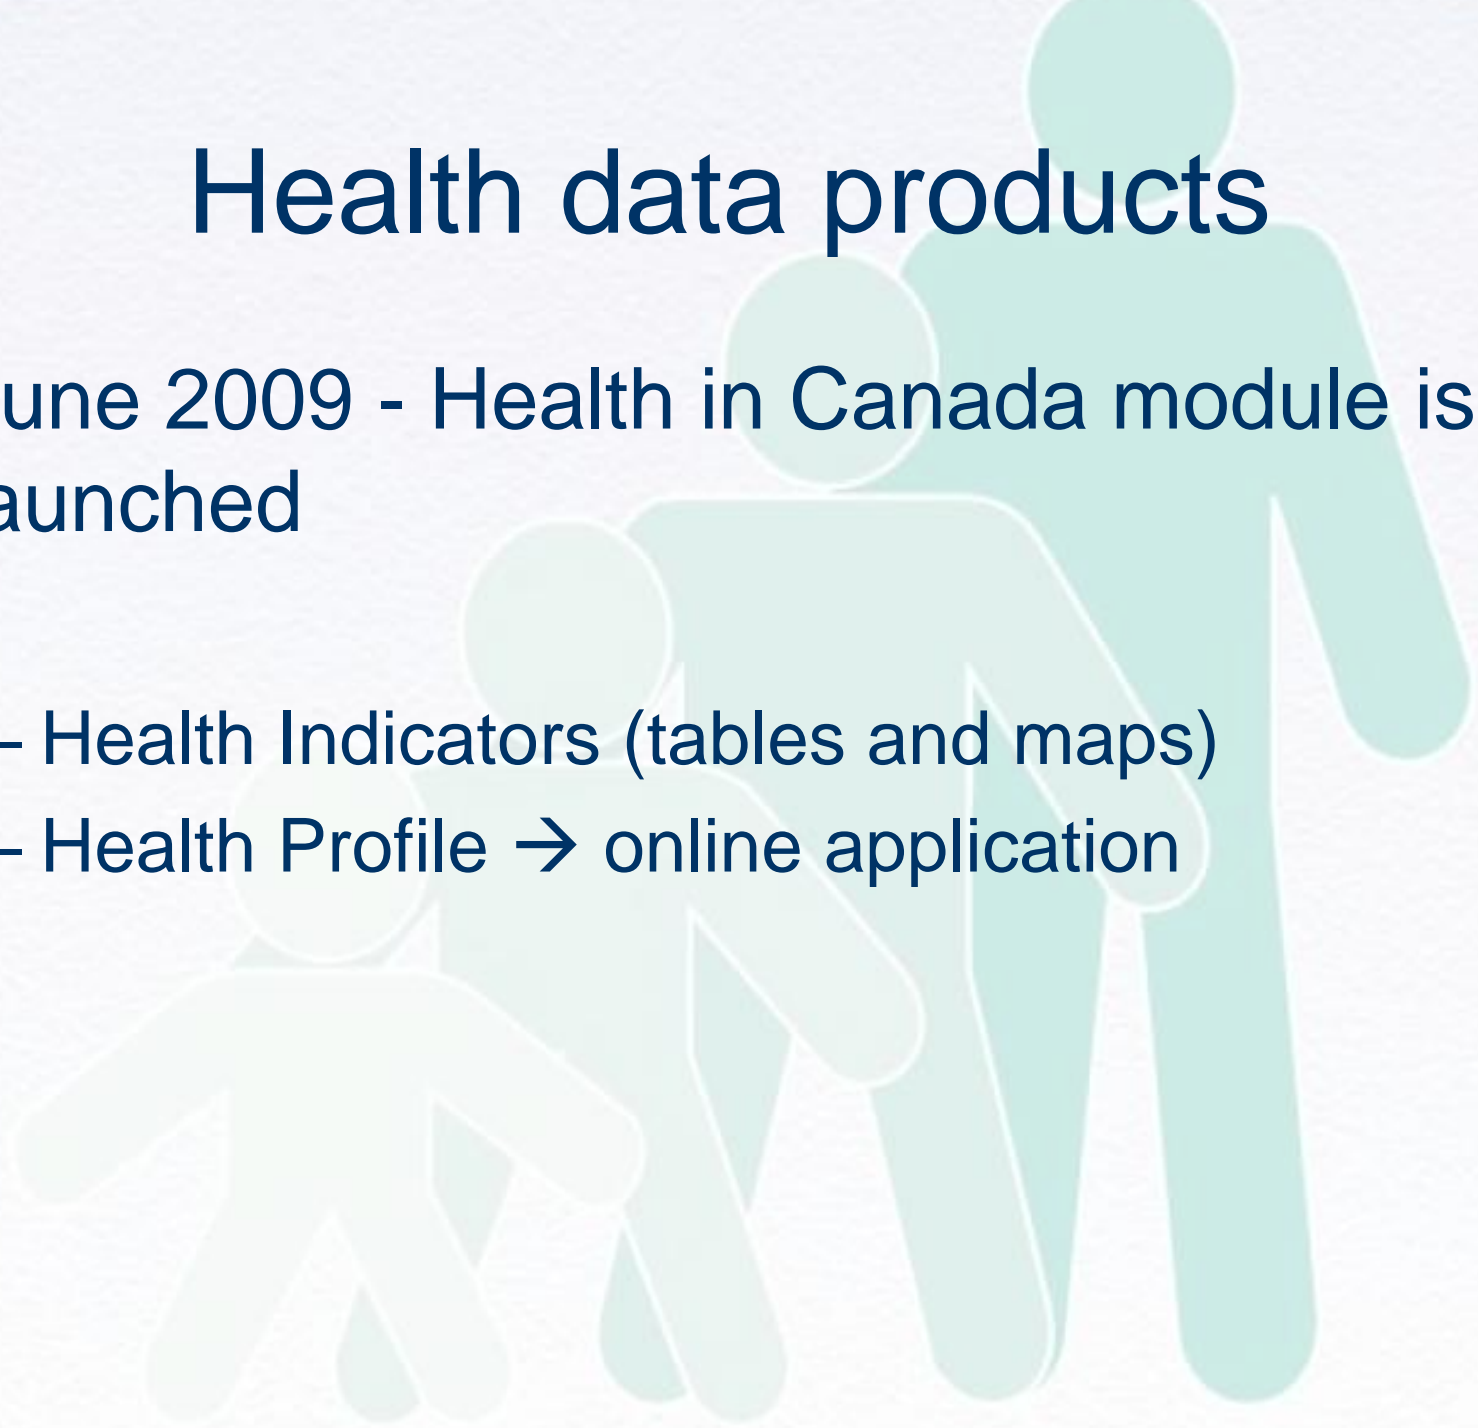

# More to come ...

- CCHS - Healthy Aging (CCHS) 2008-2009
- CCHS - Mental Health Stigma and Discrimination Content Module - Test (CCHS)

# Health data products

- June 2009 - Health in Canada module is launched
  - Health Indicators (tables and maps)
  - Health Profile → online application

2009, volume 1, no. 1

[What's new in this issue](#)**Providing the latest readings on the health of Canadians – region by region**

This publication, produced jointly by Statistics Canada and the Canadian Institute for Health Information (CIHI), is a compilation of over 80 indicators measuring health status, non-medical determinants of health, health-system performance and community and health-system characteristics.

These indicators are produced at the health region level, as well as at provincial, territorial and Canada levels. Data used to calculate the indicators are the most recently available and represent a wide range of sources including the Census, surveys and administrative health data. Definitions, data quality, concepts and methodology notes provide information necessary to interpret the indicators.

Maps are available for selected indicators.

# About the Health Profile

“My compliments to the folks who put this together for providing the 'comprehensive download' facility. It makes things a \_lot\_ easier for anyone who wants to look are more than 2 health regions at a time 8-)  
And I am also delighted to see that this falls under the DSP licence, rather than the much more restrictive DLI licence.”

Laine Ruus, DLI list, June 25, 2010

# Demo of Health Profile

- Following up on significant difference on “strong fear of being too fat or obese” between women living in Quebec and Central East.Ontario
- Indicator: “Perceived mental health, very good or excellent”
- [Health Profile](#)
